News Republic App

Proposal Overview

We are about to develop a News Application having easy accessibility for various categories of news. The variance in this is amazing UI/UX which makes it look functional and helpful than others so that people of all age groups will use it.

Coming Up with an Idea

Firstly, name of our application is "**NEWS REPUBLIC**". The discrete features of this application are designed and implemented by taking in view the senior citizens and fast pace working youngsters as seniors need ease of access of searching the right information for them and young people do not have enough time to leverage to find deep stuffs. We are going to deploy beautiful UI with ease of access which people can find smooth to access.

Deciding on Features

Our project features include the following:

- Implementing in Android Studio
- Beautiful User Interface (UI)
- Categories of News
- Switching between News
- Sharing Feature for News
- Add Favorite News at Saved News Location

Project does have:

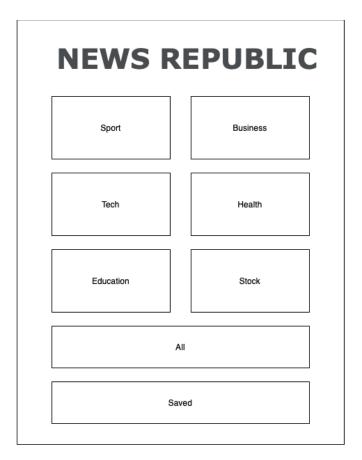

- 1. At least three four screens with substantial user interaction.
- 2. Data which is persisted locally.
- 3. A networked connection using API's to and/or from the application.
